The screenshot shows a web-based configuration interface for a video intercom system. The window is titled 'Configuration' and has a sidebar on the left with various settings categories. The 'Access Control' category is selected and highlighted with a red box. The main content area is divided into tabs: 'Password Settings', 'Door Parameters', 'Card Security', and 'Elevator Control Parameter'. The 'Password Settings' tab is active. It contains a 'Password Type' dropdown menu set to 'Public Password2'. Below this are two input fields: 'Password' and 'Confirm', both containing masked characters (dots) and a green checkmark icon, indicating they are valid. A red 'Save' button is positioned below the input fields. The sidebar categories include Local, System, Network, Video/Audio, Image, Event, Schedule, Intercom, Access Control (highlighted), Device Management, and User.

Notice: you can set up to 16 public passwords and each password consists 4-6 digits.

3. Open door with the public password

Enter the public password in the format of **#public password#** on the keypad and you will hear the voice prompt “the door is open”
